ENVIRONMENTAL PROTECTION POLICY

It is important to improve continually work conditions in company. We as a producer of solid wood furniture produce furniture which conform to the environmental requirements that consumer will get not only qualitatively but also environmentally -friendly furniture.

Team of company had determined these priorities in pursuance of the environment protection policy:

- To decrease a pollution of nature to improve the waste separate out and the accumulation technologies. To install a cleaner equipment of chemical waste and technologies which reduce pollutants quantity discharged into the atmosphere.
- To save environment by reducing waste quantity. To work only with companies which have the waste administration licences.
- To reduce atmospheric pollution by improving furniture production processes technologies and choosing suitable raw materials.
- To use economically raw materials, stocks, nature and energetic resources.
- To control the impact to environmental of usable raw materials and stocks.

A company reaches to organise its activity that it would be done the less negative impact for nature:

- To comply all state's applied environmental protection legal requirements and execute environmental protection prevention and control, which are connected to environmental protection of company.
- To intend required resources to implement the available environmental protection purposes and tasks.
- To analyze and evaluate periodically the production process effect to environmental, and certainly control it.
- To use at least harmful material to environmental (how and where it is possible) that to reach the higher level of environmental protection.
- To bring all company's employees to activity of environmental protection implementation.
- To review the environmental protection policy annually and if necessary it could be corrected.
